

SCHMIDT® Cylinder units

For flexible use

SCHMIDT®

Double-acting **cylinder units** are useful components for the construction of special machines. They can be mounted independently and are equipped with a magnet kit for detecting the corresponding end position using a cylinder switch. As flange or side-mount model, with toggle transmission or as hydro-pneumatic cylinder unit in the force range up to 100 kN (22,480 lbs.).

Technical data	SCHMIDT® Cylinder units	
Type No.	Press head model	Flange model
20 – 29	●	●
32 – 36	●	
61 – 68	●	● (not for No. 61, 62, 65)
323 – 368	●	●

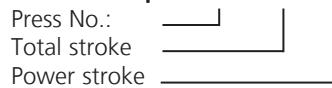

For the performance data, please refer to the chapters **SCHMIDT® Pneumatic Press** with force/stroke monitoring, **SCHMIDT® Pneumatic Press** and **SCHMIDT® HydroPneumaticPress**.

Order indications

Key for design options

Cylinder unit / stroke / design

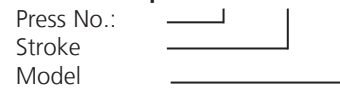

Order example 65 - 50 - 6

= **SCHMIDT® Cylinder unit** No. 65
with total stroke 50 mm and power stroke
6 mm as press head model (65M.50.6)

Cylinder unit / stroke / design

Order example 20 - 50 - FL

= **SCHMIDT® Cylinder unit** No. 20
with stroke 50 mm as flange model (20F.50)

Special strokes on request
